

FINAL YEAR PROJECT TITLE REQUISITION

Project Information

The students shall complete this section.

Program Name: MMU CAS (MMU counseling appointment system).

Subject Name: CPT4214 FYP

Project Title: Development of MMU CAS, the counseling appointment system

Student(s) Name	Student(s) ID	Contact Number	Email
MUHAMMAD ADAM AQIL BIN ROSLI	1221202134	01161247086	1221202134@student.mmu.edu.my
ROHIT BALAKRISHNAN	1221201231	01136071345	1221201231@student.mmu.edu.my
NABIL BIN ABDULLAH	1211209277	01165621986	1211209277@student.mmu.edu.my

OBJECTIVES OF COUNSELING APPOINTMENT SYSTEM :

- Streamline Appointment Scheduling:**
Automate the process of booking, approving, and managing counseling appointments to reduce administrative workload.
- Improve Accessibility:**
Enable students to easily request, schedule, and manage counseling sessions online without the need for physical visits.
- Enhance Communication:**
Provide a platform for direct communication between students and counselors via chat or messaging.
- Provide Timely Notifications:** Send reminders and updates for upcoming sessions, rescheduled meetings, or cancellations to both students and counselors.
- Promote Student Well-being:** Ensure students have quick and reliable access to counseling services, fostering better mental health and academic performance.

TARGET USER :

Students:

- University students seeking counseling services for academic, career, or personal issues.
- Users who need an easy way to request, schedule, and manage appointments online.

University Counselors:

- Professional counselors who provide guidance and need a system to manage their schedules, appointments, and student records efficiently.

KEY FEATURES(SCOPE OF THE PROJECT) :

1. **Appointment Booking for Students:**
 - Students can request counseling appointments by selecting an available date and time.
 - Basic form submission for appointment requests (e.g., name, student ID, reason for Appointment, gender option of counsellor (optional)).
2. **Counselor Schedule Management:**
 - Counselors can view requests and approve or decline appointments.
 - Counselors set their available time slots on a simple interface.
3. **Notifications:**
 - Basic email or system notifications for approved or declined appointments and messages.
4. **History Tracking:**
 - Students and counselors can view a basic list of past and upcoming appointments for reference.
5. **Chat feature**
 - Enable a forum-like messaging system where students can leave a message for guidance and Admin/counsellor can reply at any convenient time.
 - Also allows private messaging to discuss about meeting and post-appointment follow-ups or additional guidance.

Project Requirements:

Software:	- Frontend: HTML5, CSS, Javascript.
	- Backend: Firebase.
Hardware:	- CPU : Intel Core i5 11th Gen (Or anything equivalent)
	- RAM : More than 4 GB Ram
	- STORAGE : more than 50 GB storage
	- OS : Windows 10 or 11.

Problem Statement:

Managing counseling appointments manually leads to delays, scheduling conflicts, and missed sessions. A simple **Counseling Appointment System** provides an easy way for students to book appointments and for counselors to manage their schedules efficiently, improving the accessibility and reliability of university counseling services.

Type of Project

- [*] Web based System / Stand alone System
- [] Mobile Application
- [] Multimedia Based System
